Features:

• Individually rotating fans adjust for ideal

comfort, or rotate to reverse airflow.

• Rotating Dial with 2 Speed Settings

• Auto Locking Expander Plus 2 Extension Panels

(Expandable from 21.65" to 33.27”)

• Can be installed horizontally or vertically for sliding windows

• Turbo Fan Blades Designed for Maximum Air Movement

• Removable feet for table-top use

• Removable bug screen

• 120V A.C. / 60Hz.

CZ329 Series

Dual Window Fan with

180o Rotating Fans

INTENDED USE:

This product is intended for indoor residential and office use only, not for industrial or other commercial applications. Use only with electrical wiring that is in good working order and that meets applicable codes and ordinances. If you have any questions whether your wiring is adequate, consult a qualified electrician. While using your fan, you should follow the IMPORTANT INSTRUCTIONS listed below. As part of those instructions, we have used the word "WARNING" to indicate the level of hazard:

WARNING indicates a hazard which, if not avoided, could result in injury or death.

IMPORTANT INSTRUCTIONS

As with all electrical appliances, basic safety precautions should always be followed to reduce the risk of electric shock, fire, or injury to persons, including the following precautions:

• Read all the instructions before using this fan.

• Use this fan only as described in this manual. Any other use not recommended by the manufacturer may cause electrical shock, fire or injury to persons.

• Do not operate the fan with a damaged power cord or after the fan malfunctions or has been dropped in any manner.

• Use of extreme caution is necessary when any fan is used by or near children, disabled persons or pets and whenever the fan is left operating unattended.

• Do not place the fan on a small, unlevel, uneven or any surface which might allow fan to tip or fall.

• For proper operation, fan should be placed on a smooth, non-combustible, level surface.

• Always unplug fan when not in use, when moving from place to place, when assembling or disassembling parts, and before **cleaning.**

• The use of attachments, not recommended or sold by the manufacturer, may cause hazards.

• Do not use outdoors.

• Do not use fan in window. Rain may cause electrical hazard (for non-window models).

• Do not operate the fan with blade guards or any safety device removed.

• Avoid the use of extension cords due to risk of fire. If an extension cord must be used, the cord must be minimum 14 AWG and rated not less then 1875 watts.

• Do not run power cord under carpeting. Do not cover cord with throw rugs, runners or the like. Arrange cord away from traffic area where it will not be tripped over.

• Do not insert or allow any object to enter any openings on the fan. Doing so may cause electric shock and/or fire hazard. Avoid contact with moving parts.

• This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

• Children should be supervised to ensure they do not play with

the appliance.

READ & SAVE THESE INSTRUCTIONS

WARNING: SHOCK HAZARD

Use your fan only in dry environments. This fan is not intended for use in a bathroom, laundry area, or similar locations, or near sinks, washing machines, swimming pools or other sources of water. Never locate fan where it may fall into a bathtub or other water receptacle. Do not use in damp environments such as flooded basements.

WARNING: HOT SURFACES

Do not touch fan motor when in use. This motor is hot when in use, to avoid burns, do not let bare skin touch hot surfaces.

WARNING: FIRE HAZARD

Fans have arcing or sparking parts inside. Do not use near combustible materials or flammable gases or sources of heat. DO NOT USE in areas where gasoline, paint or flammable materials are used or stored. To prevent a possible fire, do not block air intakes or exhaust in any manner. Do not insert or allow foreign objects to enter any ventilation or exhaust opening as this may cause an electric shock, fire, or damage the fan.

WARNING: ELECTRICAL SHOCK HAZARD

Do not use with damaged cord or plug. Use with adequate electrical system that is up to code.

CAUTION: TO PREVENT ELECTRIC SHOCK,

this product has a polarized two prong plug (one blade is wider than the other) that must be fully inserted in to a matching properly grounded outlet. This plug is designed to fit a polarized outlet only one way. If the plug does not fit fully into the outlet, reverse the plug. If the plug still does not fit, contact a qualified electrician. Do not attempt to defeat this safety feature

CAUTION: To reduce risk of fire and to properly exhaust air,

be sure to duct air outside - Do not vent exhaust air into spaces within walls or ceilings or into attics, crawl spaces, or garages.

WARNING: TO REDUCE THE RISK OF FIRE OR

ELECTRIC SHOCK, do not use this product with any solid-state speed control device.

DO NOT operate any fan with a damaged cord or plug or after fan malfunctions, has been dropped or damaged in any manner. Do not operate fan with a broken blade, safety cage or any visual imperfections. Disconnect power before servicing. For repairs covered under warranty, see warranty statement. For all other repairs contact Comfort Zone® Customer Service by telephone or

mail for information and assistance.
DO NOT run power cord under carpeting. DO NOT cover cord with throw rugs, runners or the like. Arrange cord away from traffic area where it will not be tripped over. Avoid the use of extension cords due to risk of fire. If an extension cord must be used, the cord must be minimum 14 AWG and rated not less then 1875 watts. Do not use an extension cord unless the plug can be completely inserted into its receptacle. Unplug the fan when not in use. Do not operate fan with its ventilation obstructed.

Installation for Sliding (Casement) windows

1. This fan has been designed for a sliding (casement) window with minimum opening of 22-1/2" high x 11-1/8" wide. The fan will be positioned vertically in the window opening, with the rigid panels (if needed) at the bottom.
2. Open window and place the fan in the opening.
3. There is an accordion style expanding side panel on one side of the fan, leave this retracted for this step. The other side has 2 rigid extension panels that slide onto the fan to give you more room for expansion. Check the fit of the window fan in the window opening and attach as many of the rigid side panels as will fit in the window opening.
4. Position the fan in the window so that the Speed Selector knob is facing toward the inside of the room. With power cord aligned in its slot and coming inside the house, place the bottom of the fan against the side of the window frame.
5. Extend the accordion side panel until the space on both sides of the fan are fully blocked.
6. Slide the window closed, making firm contact with the top of the fan (See Fig. 2). Secure window in position tight against the fan top.

Note: It is the customer's responsibility to be sure the fan is secure in the window. If the fan does not fit securely into window, pull out the Built-In Extender Panel to achieve a secure fit.

CAUTION: Fan will not stop a child from falling out of the window.

Keep children away from open windows.

Instructions for Floor or Table Use:

Simple assembly is required to use this fan on a table or floor. Locate 4 slots on the base of fan (See Fig. 3). Push fan leg into slot to lock in place. Repeat this action on the other leg.

Adjustable Fan Head Angles:

Fan heads rotate individually to adjust the direction of air flow. Push the fan heads in either direction to adjust the direction of airflow for comfort and circulation. Each fan head can be rotated completely around to reverse the air flow. Push the right side of each fan until it rotates 180° and blows in the opposite direction. (See Fig. 4).

USAGE:

Fan Operation: Always operate the fan following all instructions and recommendations listed in this manual. This fan can be used horizontally in double-hung windows, or vertically in sliding (casement) windows.

Fan Location: Place the fan in the area of the room that will provide proper fan cooling. This fan can be placed in a window to blow air into the room from the outside, or it can blow room air outside, or it can circulate air by blowing both inward and outward at the same time.

Fan Connection: Plug fan directly into 120 volt A.C., 60 Hz wall outlet. Be sure plug fits tightly in outlet. A loose connection may cause overheating and damage to the plug or fan.

Note: To prevent overloading a circuit, do not plug the fan into a circuit that is servicing other electrical needs.

Turning Fan On/Off: To start the fan, rotate Control Dial from 0 position to desired fan speed (I or II). Rotate dial to 0 to discontinue use. Unplug fan when not in use.

INSTALLATION:

This window fan has been designed to fit either double-hung or sliding (casement) windows. If space allows, window screens can be left in place.

Your fan comes fully assembled and is ready for window installation. Do not use the optional feet when installing in a window.

Installation for Double-hung windows

1. This fan has been designed for a double hung window with minimum openings of 22-1/2" wide x 11-1/8" high.
2. Open window and place the fan in the opening.
3. There is an accordion style expanding side panel on one side of the fan, leave this retracted for this step. The other side has 2 rigid

extension panels that slide onto the fan to give you more room for expansion. Check the fit of the window fan in the window opening and attach as many of the rigid side panels as will fit in the window opening.

4. Position the fan in the window so that Speed Selector knob is facing toward the inside of the room. With power cord aligned in its slot and coming inside the house, place the bottom of the fan over the sill cap of the window.

5. Extend the accordion side panel until the spaces on both sides of the fan are fully blocked.

6. Lower the window sash down, making firm contact with the top of the fan (See Fig. 1). Secure window sash tight against the fan top.

Note: It is the customer's responsibility to be sure the fan is secure in the window. If the fan does not fit securely into window, pull out the Built-In Extender Panel to achieve a secure fit.

LIMITED WARRANTY

Bug Screen Covers: The bug screens have plastic frames that simply snap on to the fan, on either side of the fan head (inside or outside). Push gently and you will hear them click in place. (See Fig. 5).

Note: Air flow may be reduced when the cover is in place.

Care and Maintenance

Cleaning: CAUTION-Before cleaning the fan be sure to disconnect power cord from the plug. Clean the grille surface with a clean damp cloth. Do not use harsh chemical or abrasive cleaners. DO NOT IMMERSE THE FAN OR ANY WIRES IN WATER. Allow fan to dry completely before use. Periodic grille

cleaning with a vacuum will prevent dust build up.

Maintenance: The internal motor bearings are permanently lubricated at the factory and do not require any additional lubrication.

Repair: DO NOT OPERATE THE FAN WITHOUT THE GRILLE IN PLACE. DO NOT USE THE FAN IF IT HAS MALFUNCTIONED OR BECOME DAMAGED IN ANY WAY

Storage: Keep original carton for storage of the fan. Coil and tie the power cord to avoid damage during storage.

Note: Some models come with a plug where you can replace a fuse. If your model has this, please read and follow the below instructions to replace the fuse.

This product employs overload protection (fuse). A blown fuse indicates an overload or short-circuit situation. If the fuse blows, unplug the product from the outlet. Replace the fuse as per the user servicing instructions (follow product marking for proper fuse rating) and check the product. If the replacement fuse blows, a short-circuit may be present and the product should be discarded or returned to an authorized service facility for examination and/or repair.

Fuse Replacement:

1. Grasp plug and remove from the receptacle or other outlet device. Do not unplug by pulling on cord.
2. Open fuse cover by sliding open fuse access cover on top of attachment plug towards blades. See Fig. 2.
3. Remove fuse carefully. Use a small tool to pry the end of the fuse from holder cavity. Be careful not to break glass window.
4. Replace fuse. WARNING: Risk of fire. Replace fuse only with identical 2.5 or 5.0 Amp, 125 Volt fuse (3.6mm x 10mm).

Besure fuse is properly seated within its cavity.

5. Close fuse cover by sliding it back to its original closed position.
